PR600 & EMP6 owners: This design is also available in PHC format ready for your machine. These files are preprogrammed with color changes and pauses to allow placing and trimming the fabric. Your machine needs to be upgraded to version 1.33 or later. Please contact me at pegboard1@yahoo.com for these files. I will provide the PHC files free of charge for the designs you have purchased from me.

When using my PHC files, set your machine (*Settings, 2nd screen, left side of page*) to show *Display Expanded Thread Color - ON*, and *Original Thread*. The Madeira thread colors listed in the chart should show on your machine. Machine should be upgraded to v1.33 or later. Pauses are already programmed. These files are machine ready. Editing them in any software program will cause all pauses and thread color programming to be lost. When merging designs in the machine, the 1st design retains its stops, following designs lose them.
